

Representative List of Products/Components

Mechanical Components

- Conventional and precision machined parts (using CNC machine, screw machine etc)
- Shell molded castings (for fluid power applications)
- Copper alloy castings (for high electrical conductivity applications)
- Sand castings (for fluid power applications)
- Aluminum pressure die castings

- Plastic molded parts
- Epoxy molded parts (for electrical/electronic applications)
- Rubber parts (for fluid power applications)
- Sheet metal parts

- Forged parts (for automobile applications)
- Components requiring forming and pressing work

- Solenoid coils (for fluid power applications)
- Wiring/ cables/ harnesses

Electrical/Electronics Components

- Current and potential transformers
- Current transformers for digital metering
- Transformers for industrial electronics
- Transformers for analog and digital telecommunications

- Analog components - Custom power supplies, Lithium-ion batteries, Copper cable assemblies and wire harnesses
- Digital components - NIC cards, hubs, media converters, Copper to fiber conversion products, CATV monitoring system

- Wireless - Voltage controlled oscillators, RF amplifiers, synthesizers and transponders
- Fiber optic cables and fibers

- Passive devices - SM and MM cable assemblies, multiplexers, switches and attenuators
- Active devices - Transceivers

- Integrated optical components- 1X N couplers and 2X 2 switches

- Packaging - Wire harnesses, Tool design, Plastic injection molding, Sheet metal enclosures, Precision components, Transformers and Filters

Foundries and Steel Industry Related Products

- Graphite electrodes
- Ferro Silicon Magnesium
- Ferro Silicon
- Amorphous Graphite balls
- Amorphous Graphite pallets
- Aluminum wire rod
- Bearings for steel rolling mills
- Gloves & boots (safety items for use in plant by workers on the shop floor)
- Cement carbide rings
- Roll guide
- Rolls for rolling mills
- Ferro Magnesium
- Magnesium metal flakes
- Tin ingot
- Silica brick
- Fire clay brick
- Gas cleaning system for coke oven battery
- Ferro Molybdenum
- Calcium Silicon
- Copper mould
- Coke for steel manufacturing
